

Pro-Life Can Change Your Life

Why am I pro-life? Genesis 1:27 says; “So God created man in His own image, in the image of God He created him; male and female He created them.” Psalm 139:13-14 says, “For you created my inmost being, you knit me together in my mother's womb. I praise you because I am fearfully and wonderfully made.” God created us in His own image, He has a purpose for each of us, and He loves all of us. A pro-life choice has impacted my entire life, and if it were not for a pro-life choice, my siblings and I would not be here.

In 1978 my grandmother found out she was pregnant with my dad before she was married. Shortly after, my great-grandmother wrote a letter to her daughter begging her to choose life over abortion. Because she wasn't married and the pregnancy wasn't planned, she thought the only choice was to end the pregnancy. Her mother's letter arrived and changed her life by encouraging her to reconsider her choice. She and my grandfather listened to the advice and committed to marriage and having the child. My dad has gone on to impact many people's lives. He is always trying to share the truth of God's Word and help people. He loves his family well and has worked hard to provide a beautiful home full of life for us.

Because of how my parents raised me, it has helped me learn to love animals and people. I have grown up on a farm full of animals, friends, and family. I understand the joy and beauty of life from this childhood. My family and I have seen baby animals be born, watched them grow, and helped raise them. The joy of watching a chick hatch, helping raise it, and watching it grow up is amazing. We have watched baby cows and horses be born and raised bunnies, ducks, geese, and even peacocks. All of these lives have made us see the importance of the life God has created.

So, why am I pro-life? I have grown up with an appreciation for all created life. Pro-life is a personal thing for our family. If it weren't for a pro-life choice I would not be here. Choosing pro-life could change your life and many other people's lives too.
